please accept this as my opposition to the National Association of Broadcasters' petition 04-160. I value satellite radio, more than I ever did traditional broadcast radio. The weather and traffic reports, when I want them, not when stations dictate I should get them, is a valuable service that I choose to pay for. To limit satellite radio in any way is, I believe, an infringement upon free enterprise, not to mention my right to listen to and spend my money as I choose. please reject this petition and any like it. thank you for your attention.
